CARLOS ALEJANDRO AGUIRRE LÓPEZ

ABOUT

I am software developer in .net technologies over 8 years of expertise right now I collaborate with the develop and maintenance of an e-commerce by a client of GammaPartners. Also, I support with projects in WordPress.

Before, I collaborated in Newton. Here we developed web projects with .net MVC, desktop applications with wpf and windows 8.1, also, I supported with the development of the colleagues as a coach

I was co-founder in a startup where I took part of getting requirements, negotiations, estimates, deployments of technologies and whole process of software development, here we development web systems for the process improvements and systems for performance assessment

I worked for the state government of chihuahua where the biggest challenge was the management of large amount of data and a system development for a medical record

I am an enthusiastic of the technology and I try to teach what I know about it, I like the treat with the people and I continue learning
